

## Project Training

COSMO offer project training for final semester student of **MCA, M.Sc. (computer science or IT), MCM, BCA, B.E (C.S)** and other courses related to **IT** on self support basis.

The Training goes on for a period of 4 months which includes working on a live project on real development environment.

We are committed to ensure that the training helps the trainees/students to achieve their academic and career goals. We are available to conduct trainings either at our premises or at your College/University. We guide our students to make a better project report to fulfill the requirements of their respective institutions.

We also provide all possible help to improve their professional and soft skills which give an edge over others in finding good placement.

We can also provide a chance to work in our office with our team as a software trainee to some our successful students.

Methodology:-

- Training consisting of theory and practical classes
- Training under team leader and project managers of CIPL
- Live Working Environment
- Opportunity of Working in team under Experienced Team Leaders on live projects
- Time to time analysis and understanding tests

We include following important phases in training:-

- Software Engineering
- FRONTEND Introduction
- BACKEND Introduction
- Advance Programming
- Project work
- Reporting / Testing
- Implementation / Live Testing
- Final Testing / Mock Interviews

Course	Duration
I) MCA/M.Sc(C.S. or IT)	4 Months
II) BCA/BE/PGDCA	3 Months
